Localization 3

Localization

Right from the beginning, YAM has been translated to multiple languages. However, the responsible translator for each specific language changed over the years. As YAM is an open source development effort since 2000, we are continously searching for individual translators joining our project. The following tables lists the currently existing translations and their responsible translator which joined our project. If you feel that you have the time and knowledge to translate YAM in your language please feel free to join our project so that we can provide a translated YAM for more and more languages.

Language	**compatible YAM version**	**Translator**
bosnian	2.3 (*outdated*)	*no current maintainer*
czech	2.6	Vit Sindlar
danish	*outdated*	*no current maintainer*
english-british	2.6	Jens Langner, Thore Böckelmann
