# GETSELECTED

## NAME

GetSelected — Get the position of the messages selected in the current folder. (V2.0)

## TEMPLATE

VAR/K,STEM/K

## FUNCTION

Gets the position of the messages selected in the current folder.

## INPUTS

VAR/K - alternative variable to put the results into instead of RESULT

STEM/K - base name used for the stems where the returned data will be stored

## RETURNS

VAR - space separated list of results

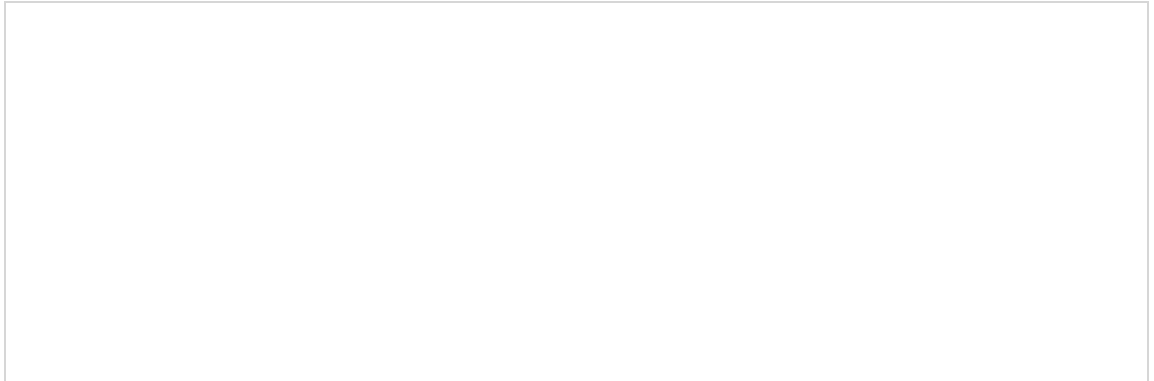

<STEM>NUM.COUNT - number of selected messages

<STEM>NUM.NR - position of the nth selected message, starting from 0; the message at the top of the list is also at position 0

The result is just "0" if an empty folder or a folder group are currently selected.

## NOTES

## EXAMPLE

## BUGS

<STEM>NUM.COUNT was not initialized for empty folders. This was fixed in V2.4.
