

LISTSELECT

NAME

ListSelect -- Select messages in the current folder. (V2.0)

TEMPLATE

MODE/A

FUNCTION

Selects or unselects messages in the current folder.

INPUTS

MODE/A - may be one of N (none), A (all), T (toggle selection) or a numeric value to add to the selection the message in that position, where 0 refers to the message at the top of the folder

RETURNS

NOTES

While 'LISTSELECT N' will unselect everything in the folder, the **current** message still remains as such, and for all intents and purposes will be considered as "selected" by all commands dealing with selected messages, e.g. GETSELECTED ?.
