

MAILCHANGESUBJECT

NAME

MailChangeSubject -- Change the subject of the selected messages. (V2.1)

TEMPLATE

SUBJECT/A

FUNCTION

Changes the subject of all the selected messages.

INPUTS

SUBJECT/A - new subject (upto 199 characters)

RETURNS

NOTES

If the supplied string is longer than 199 characters, it will be truncated.

EXAMPLE

```
/* Change the subject of the selected messages */
```

```
'MAILCHANGESUBJECT "This is the new subject"'
```

BUGS

The command didn't check that the string was not longer than the maximum length allowed, causing a buffer overrun that spilled onto the message file comment when this happened. Fixed in V2.4.
