

MAILCOPY

NAME

MailCopy -- Copy the selected messages. (V2.0)

TEMPLATE

FOLDER/A

FUNCTION

Copies the selected messages to the specified folder.

INPUTS

FOLDER/A - name or number of the destination folder; the folder at the top is at position 0

RETURNS

RC is set to 10 if the specified folder doesn't exist.

NOTES

Except for the filenames, the copies are identical to the originals.

The command doesn't mind the type of folder, i.e. it will copy an outgoing email to the "Incoming" folder if instructed to do so.

EXAMPLE

```
/* Copy the selected messages to a custom folder */
```

```
MAILCOPY Archived
```
