

# **MAILUPDATE**

## **NAME**

MailUpdate -- Update the index of the current folder. (V1.3.3)

## **TEMPLATE**

## **FUNCTION**

Updates the index of the current folder.

## **INPUTS**

## **RETURNS**

## **NOTES**

## **EXAMPLE**

## **BUGS**

There isn't any guarantee that the index is actually updated or created, i.e. if the relevant ".index" file has been write protected, no error will be reported.
