**Subject: YAM - Yet Another Mailer - Documentation/ARexxAPI/WRITEBCC**

**Version: 6**

**Date: 27/02/15 14:11:01**

## Table of Contents

Languages:	3
WRITEBCC	3

**Languages:**

- **English**
- [Español](#)

**WRITEBCC****NAME**

WriteBCC -- Enter one or more names, addresses or aliases into the "Hidden copies to" field of the Write window. (V2.0)

**TEMPLATE**

ADDRESS/A/M,ADD/S

**FUNCTION**

Enters one or more names, addresses or aliases into the "Hidden copies to" field of the Write window. YAM will resolve names and aliases looking in the address book.

**INPUTS**

ADDRESS/A/M - list of names/addresses/aliases

ADD/S - prevent the new data from replacing the old data already present in the "Hidden copies to" field

**RETURNS**

RC is set to 10 if no Write window was previously specified as "active" with [MAILWRITE](#).

**NOTES****EXAMPLE**

```
/* Set the active Write window */
MAILWRITE WINDOW 0

/* Adds some BCC recipients to a message */
'WRITEBCC "George Bush" "j_doe" "carol@example.com" ADD'
```
