

WRITEMAILTO

NAME

WriteMailTo -- Enter one or more names, addresses or aliases into the "To" field of the Write window.

TEMPLATE

ADDRESS/A/M

FUNCTION

Enters one or more names, addresses or aliases into the "To" field of the Write window, replacing whatever was already there. YAM will resolve names and aliases looking in the address book.

INPUTS

ADDRESS/A/M - list of names/addresses/aliases

RETURNS

RC is set to 10 if no Write window was previously specified as "active" with MAILWRITE ?.

NOTES

Superseded by WRITETO ? in V2.0+.

EXAMPLE

```
/* Set the primary recipients of a message */
```

```
MAILWRITE WINDOW 0 /* Set the active Write window */  
'WRITEMAILTO "George Bush" "jdoe" "carol@?"'
```
