

WRITEQUEUE

NAME

WriteQueue — Put a new message into the Outgoing queue.

TEMPLATE

HOLD/S

FUNCTION

Puts a new, just composed message into the Outgoing queue.

INPUTS

HOLD/S - mark the message as "Hold" to avoid sending it by mistake (V2.0)

RETURNS

RC is set to 10 if no Write window was previously specified as "active" with MAILWRITE ?.

NOTES

EXAMPLE

```
/* New mail */  
  
MAILWRITE  
WRITETO boss@?  
'WRITESUBJECT "I don't think I can go to work today"  
WRITELETTER 'work:excuses.txt'  
WRITEQUEUE
```
