

WRITESUBJECT

NAME

WriteSubject -- Enter a subject into a new message.

TEMPLATE

SUBJECT/A

FUNCTION

Enters a subject into a new message.

INPUTS

SUBJECT/A - subject of the message (upto 199 characters)

RETURNS

RC is set to 10 if no Write window was previously specified as "active" with [MAILWRITE ?](#).

NOTES

If the subject is longer than 199 characters, it will be truncated.

EXAMPLE

```
/* Set subject */
```

```
MAILWRITE WINDOW 0 /* Set the active Write window */  
'WRITESUBJECT "This is the subject"'
```
