

WRITETO

NAME

WriteTo -- Enter one or more names, addresses or aliases into the "To" field of the Write window. (V2.0)

TEMPLATE

ADDRESS/A/M,ADD/S

FUNCTION

Enters one or more names, addresses or aliases into the "To" field of the Write window. YAM will resolve names and aliases looking in the address book.

INPUTS

ADDRESS/A/M - list of names/addresses/aliases

ADD/S - prevent the new data from replacing the old data already present in the "To" field

RETURNS

RC is set to 10 if no Write window was previously specified as "active" with [MAILWRITE ?](#).

NOTES

EXAMPLE

```
/* Set the primary recipients of a message */
```

```
MAILWRITE WINDOW 0 /* Set the active Write window */
```

```
'WRITETO "George Bush" "jdoe" "carol@?"'
```
