Changes sorted by Type

Type: bug (57 matches)

#	Issue	Resolution
14	Implement the proper LPT support for the whole series of a folder. This allows user to search documents without having to select a folder class.	Implement the correct handling request when using various address books of LPT.
15	Fixed a problem where VMS was unable to create properly LPT-associated icons.	
16	Implement a comparison of two protocols: the address book and the folder class. The address book was unable to identify the folder class by using the same address. This functionality is now available for all address books.	Implement a comparison of two protocols: the address book and the folder class. The address book was unable to identify the folder class by using the same address. This functionality is now available for all address books.
17	Fixed a problem where VMS was unable to create properly LPT-associated icons.	
18	Fixed a problem where VMS was unable to create properly LPT-associated icons.	
19	Fixed a problem where VMS was unable to create properly LPT-associated icons.	
20	Fixed a problem where VMS was unable to create properly LPT-associated icons.
